ROBERT J. BARHAM
SECRETARY

DEPARTMENT OF WILDLIFE AND FISHERIES
OFFICE OF SECRETARY

Louisiana Natural & Scenic River System
SCENIC RIVER PERMIT #924

Issue/Effective Date: April 24, 2015

Scenic River: Saline Bayou

Recipient: PennTex North Louisiana, LLC
c/o Providence Engineering and Environmental Group, LLC
Attn: Ryan Coleman
1201 Main Street
Baton Rouge, LA 70802

Description: HDD Installation of a 10 inch Natural Gas Liquids Pipeline

This permit is issued by authority of Part II of Chapter 8, Title 56 of the LRS of 1950 as amended and re-enacted regarding the Louisiana Natural & Scenic Rivers System and the administrative procedures pertaining to the management of these watercourses designated as Scenic Rivers.

The permit is issued by the Administrator with the understanding that the recipient in implementation of the proposal will proceed in compliance with, and not significantly deviate from the provisions contained in the petition for the permit and any special conditions attached hereto. The permit holder is expected to minimize adverse impacts to the structural and functional integrity of the natural systems and aesthetics associated with the Scenic River where the activity is occurring so as to preserve the fundamental character and purpose for which the System was established.

The Administrator assumes no responsibility for or incurs no liability for any injury to persons or property caused by any act of the permit holder or his agent in the permission granted by this permit. In addition to the Department of Wildlife & Fisheries, the petition was given a full and thorough evaluation by the Louisiana Departments of Agriculture & Forestry; Culture, Recreation & Tourism; Environmental Quality; and the Office of State Planning and Budget. If during the review process objections were made to the proposed activity, those objections were either found to be insignificant or they have been included in the conditions of the permit.

This permit shall expire if the permitted activity has not begun within 18 months of the "Issue Date" indicated above.

Compliance with these conditions is necessary for this permit to be valid:

- 1) This project must be carried out in a manner consistent with the design that the applicant submitted during the permit process. Should significant physical modification to the project become necessary during implementation of the project or after its completion, the permit holder will submit a letter of explanation within one week of discovery to the Administrator to determine if another petition will be required.
- 2) If during project activity, any sensitive archaeological, biological or botanical element is encountered, activity will temporarily cease and the permit holder will contact the Administrator to determine the disposition of that element or artifact.
- 3) All other applicable permits not contingent upon this permit from governmental entities will be acquired and their conditions implemented with fidelity. Applicant has title to the property or permission from the landowner to implement the project.
- 4) Adequate erosion control measures shall be implemented to insure that no sediments, pollutants, and/or construction related debris are allowed to enter Saline Bayou, whether directly or indirectly, as a result of this construction.
- 6) The permittee shall allow representatives of the Department of Wildlife and Fisheries to make periodic inspections to ensure the activity being performed is in accordance with the conditions of this permit.
- 7) There is to be no clearing of right-of-way above the directionally drilled segment of the pipeline.
- 8) An authorization issued under the authority of this permit may not be transferred to another party without giving prior notice to the Scenic Rivers Program Coordinator.
- 9) Within 60 days from the date (April 28, 2015) of this permit authorization, the applicant shall provide LDWF a copy of the operational contingency plan that details identification and response to a potential product loss for review and approval before this liquids pipeline goes into service. LDWF understands that these plans are confidential and proprietary, and will not include them in the public record for purposes of this application.
- 10) Any product loss shall be reported to the Scenic River Program immediately upon discovery. Please contact Kyle Balkum at (225)765-2819.

If you need any additional information you may contact Mr. Kyle Balkum, Biologist Program Manager, in the Baton Rouge Office at (225) 765-2819.

Robert J. Barham
Administrator
